

## Field Engineering

### Committed to Your Goals

Have a challenging system or program and need training for it? TCI can handle it. Our field engineering subject matter experts make a commitment to your goals, ensuring your success and the successful implementation and operation of your product.

### The Whole Picture

Our experts offer comprehensive training and documentation on any system or program. This total training package enables you to accomplish your program goals and ensures a truly sustainable solution.

### Ready for Your challenge

The TCI field engineering team fully supports the U.S. Navy's Carrier and Amphibious Strike Groups, Ships, and Submarines as they deploy to protect our nation and allies. The U.S. Navy uses some of the most challenging systems in the world. As a result, our team's skills, experience, and perseverance make them highly qualified for your challenge. Not to mention, we're conveniently located all around the U.S.

## Field Engineering Capabilities

- End-to-End System Level Training
- Curriculum Development and Implementation
- Life Cycle Support
- Engineering Change, Installation, Development, Review, and Conduct
- System Operational Verification Test
- Concept of Operations Review
- Equipment/System Troubleshooting Assistance
- Installation Tracking & Management

## Defense Systems Experts

- Satellite Communications Subject Matter Experts (EHF/SHF/GBS)
- Ballistic Missile Defense (BMD)
- Deploying Strike Group Systems Integration Testing (DGSIT)
- Common Submarine Radio Room
- Teleport Gateway Support

## Team Highlights

Our field engineering experts have worked in a wide variety of industries, many with 20+ years of experience.

## Awards and Recognitions

- Received over 100 performance recognitions from clients
- Completed over 800 successful training missions
